

# France Study Abroad 2019

BY: WILL KIMMEY

# Getting to Europe

After flight delays, a layover in New York, and trying to figure out the public transportation in Paris, we finally arrive and it's time to start the trip of a lifetime....

Not knowing the language either...

# Paris

Heard about Versailles in school and it was just as massive and extravagant as expected

Spent less than a week in Paris but went so many places and saw so much history

# Paris

Went to the Eiffel tower 3 nights in a row and had a wonderful time sitting on the lawn

Jose came to my rescue

Definitely not wine

# Nice

Saw some great views,  
a waterfall, sports cars,  
and enjoyed the cold  
refreshing water of Nice

We cooked a  
great dinner one  
night

# Nice

Touched some jellyfish and got stung while snorkeling but that's just part of the experience

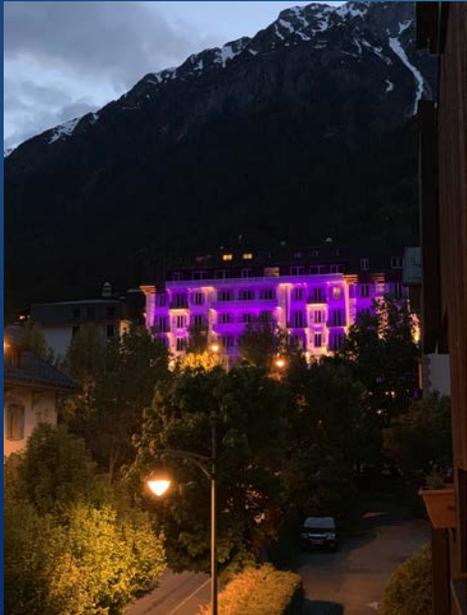

Enjoyed some amazing food with amazing people

# Chamonix

Day 1 hike:  
-1100 meters of  
elevation gain.  
-2.5 hour hike up  
-100% would do it  
again.

Glacier: day 2  
We climbed down  
some sketchy ladders  
down to the glacier,  
which is unimaginably  
massive. Also drank  
some glacier water,  
highly recommend

# Bologna and Venice

Venice, the river city. We saw a riot, went on a boat tour, and went to the Gucci and Louis Vuitton store because why not?

Flew into Bologna, saw a beautiful lambo. Slept in the airport and on park benches and spent the day roaming around.

# More pictures

The food, especially Nutella crepes, was spectacular

Verdon Gorge was absolutely stunning with its blue water. We swam across and back, which was pretty awesome

# Ending

- ▶ This is a trip I will remember for the rest of my life
- ▶ I had so many unique experiences along the way and explored so much history
- ▶ Traveling around proved to be slightly difficult but we managed to make it back everytime
- ▶ The people I met along the way and the friends I have made are definitely an added bonus to this amazing trip
- ▶ Also, fluid dynamics was probably one of my favorite classes I have taken so far in college and Paco is truly a great professor! (not trying to suck up haha)
