SHORT  
BRIEF

# Paris, France

While in our free time in Paris, we enjoyed exploring the city and taking in all the beautiful scenery it has to offer.

# Palace of Versailles

# Local market

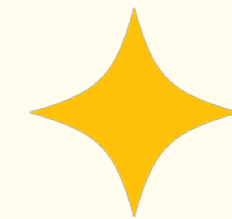

# Monaco

We took a short day trip to Monaco during the Race weekend for Formula 1

Got to experience a little bit of what it felt like to be rich.

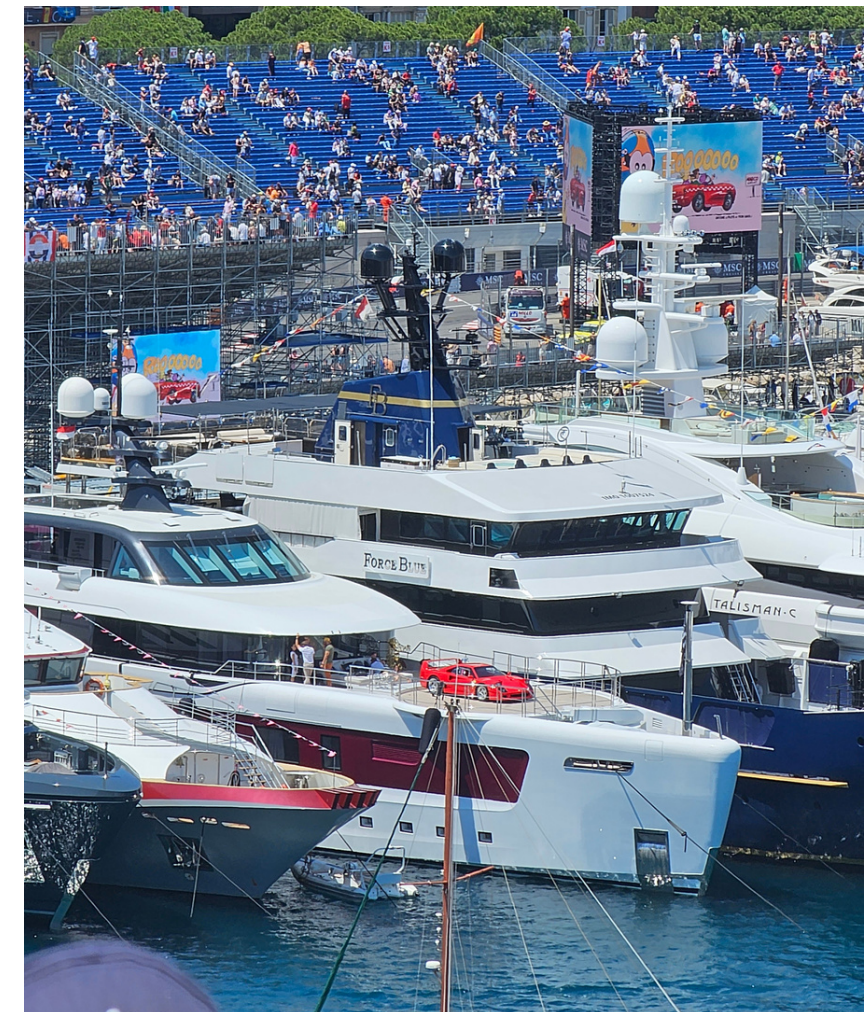

Although we were unable to get tickets to see the race it was still a day I will never forget.

# Monaco

# Calanques

WHAT WENT  
WELL

At the Calanques, we took a boat tour around the cliffside.

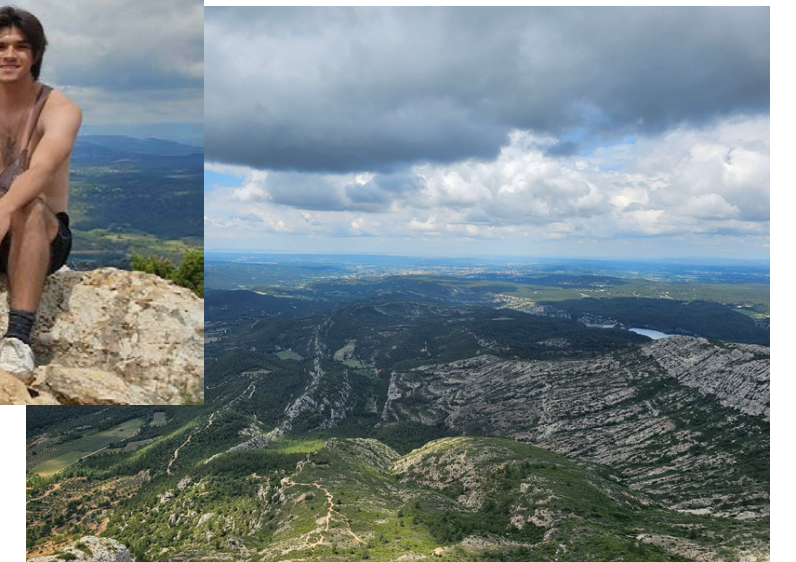

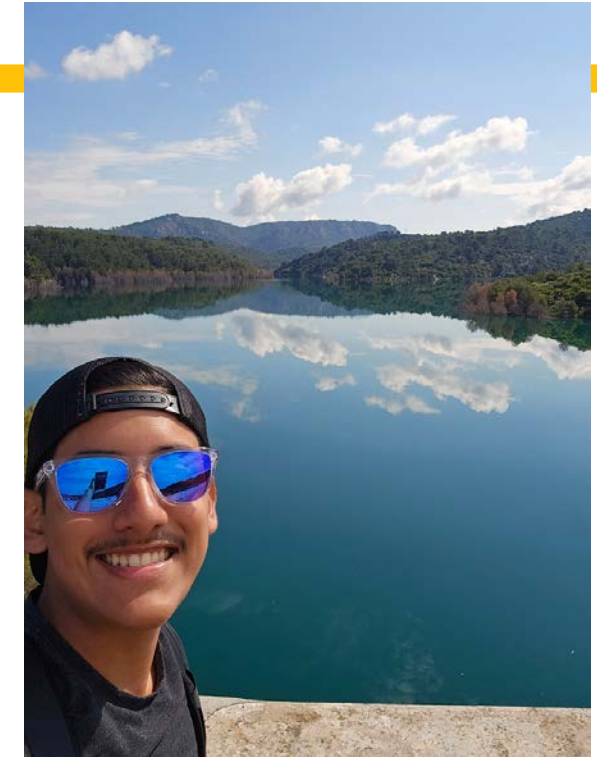

# The Great Outdoors

Probably one of the best places to hike due to the beautiful weather.

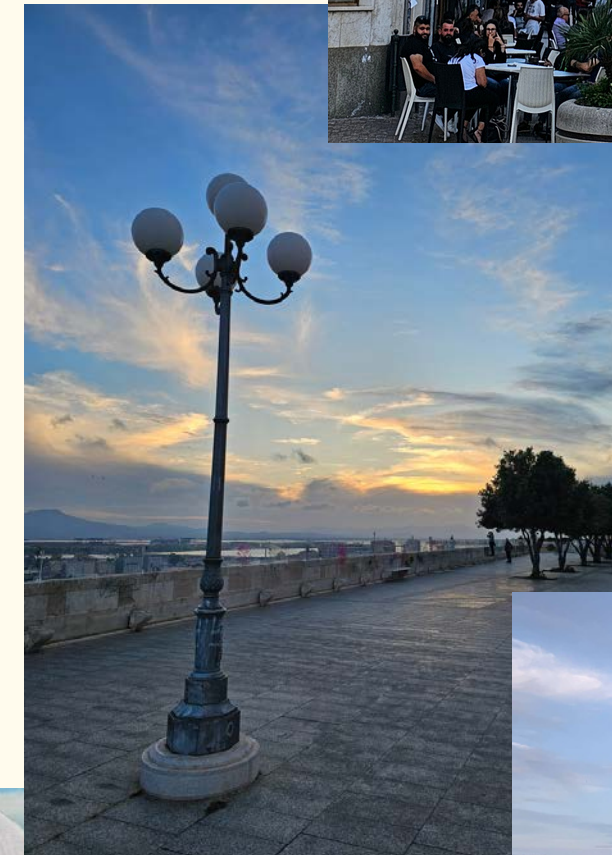

# Sainte-Victoire Mountain

# Sardinia, Italy

For our 6-day weekend, my group and I decided to travel to a small island off the coast of Italy visiting three different cities.

# Verdon Gorge

# Marseille

We spent the last two nights of the program in Marseille. On the last night we were in France I had dinner with my new friends from the Mechanical Engineering program. I couldn't have had a better ending to this trip.

# Special shout out

Although we had agreed on trying new restaurants every day to get the full experience, we found ourselves becoming regulars at this small hole-in-the-wall restaurant. Even though the owner did not speak a lick of English we quickly became friends.

# Overall Reflection

Words cannot describe how grateful I am to have been able to go on this study-abroad trip. The people I meet and the friends I made along the way are something I will never forget.

Taking Fluid Dynamics abroad was one of the best decisions I have ever made. The smaller class size really allowed everyone to bond and get to form better relationships with our teacher, Paco.

Before attending this program I had never traveled outside of Texas before. This trip really opened my eyes to so many different cultures personalities I would have otherwise never been able to experience.

Going on this trip helped make me more comfortable doing things that are outside my comfort zone.

Merci  
& Gig
